EDUCATION

+2 science

st. joseph higher secondary school

Bhalwari, Rupandehi

Jan, 2015 - Jan, 2017

BE in computer engineering

lumbini engineering college

Bhalwari, Rupandehi

Apr, 2018 - Present

PROJECTS

Online Store E-commerce Website

This is a Django-based e-commerce website with the following features:

- User authentication (login/register)
- Superuser admin panel
- Product catalog with categories
- Shopping cart functionality
- Responsive design

Fake News Detection (Django)

A Django-based web application for detecting fake vs. real news using multiple NLP/ML models. It provides a browser UI with authentication and a JSON API for programmatic predictions. Model assets are loaded from the data/models directory, and searches are logged to data/searches/searches.csv.

EduAssist

EduAssist is a Node.js + Express web app with static HTML/CSS/JS pages and a PostgreSQL backend. It provides an academic assistance site with user auth, superuser dashboard, contact/review collection, order submission, and sample document management with file upload and secure download.

Phishing Detector

This is a Django-based web application for detecting phishing URLs. It uses machine learning models to analyze URLs and predict whether they are legitimate or phishing.

Micro-Learning

A complete micro-learning experience built with:

- Telegram bot (python-telegram-bot) for user interaction
- FastAPI backend + PostgreSQL for data storage
- Streamlit dashboard for real-time analytics

Secure File Upload (Django)

Secure, auditable file uploads with authentication, strict validation, MIME sniffing, integrity checks, and multi-backend malware scanning.

SKILLS

Linux, Python, Basic Hardware and Networking

LANGUAGE

English, Nepali
